rob.perkins@089DJ.com**

At the end of the nineties Robert James Perkins worked as label manager for 8Ball Records/New York and Kicken Records/London. Here he not only represented the interests of the labels in Germany, Austria and Switzerland, but here also came the great love for electronic music that continues to this day and is getting stronger and stronger...

For more than 30 years on the road as a DJ, enriched countless events musically, "rocked" the most diverse

types of events, parties, festivals and special events in several European countries, he has now developed in recent years autodidactically to remixer, MashUper and producer.

This development continues to this day and the hunger for new techniques, sounds and beats is still there for the native Austrian as on the first day. So you can be curious what Robert James Perkins still comes up with everything to enrich the fast-moving music scene.

In 2021 Robert James Perkins founded his own small digital record label "BEATZEKATZE records". Here he releases not only his own tracks, but also those of friendly artists and DJs. As a pure electronic music label you can find any kind of electronic music genre here.
